Deputy Director**

BUSINESS DIVISION

Harvey Kailin, Chief

Acknowledgments

This report was prepared in the Business Division under the supervision of **Harvey Kailin**, Chief, and **Henry Wulff**, Assistant Chief for Census Programs.

Robert Viehman, Chief, Retail Trade Branch, was responsible for the retail trade segment of the Census of Business. **Philip Chenoweth** was in charge of reviewing, selecting, and coding the Federal income tax reports for non-employer establishments.

Gerda Mones was the division's liaison officer with the Jeffersonville Operations Office and supervised the division's professional staff at that office. **Gerald Post** contributed to the entire project, particularly in the analysis and collection of reports for the large and complex corporate organizations. **Robert W. Scheidel**, **Patricia A. Clark**, **Mabel N. Foster**, and **C. Daniel Bremer** also participated in the analysis of data and preparation of the report. Staff assistance was provided by **Ralph S. Woodruff**, Assistant Division Chief, Research and Methodology, and **Max Shor**, Assistant Division Chief, Staff and Special Projects.

Systems and procedures were developed in the Economic Operations Division, **M. D. Bingham**, Chief, by **Sol Dolleck**, Assistant Chief for Systems, assisted by **Samuel Schweid**, **Nathan Lesowitz**, and **Jack Margolis**. **Heyward D. Glisson** developed and supervised the electronic computer programming under the direction of **John S. Lannan**. Quality control plans and procedures were developed and supervised by **Herman H. Fasteau**, assisted by **George Minton**. Others who participated in the development of systems and procedures were **Jack Scharff**, **Irving Weiss**, **Jerry S. Cooper**, **William W. Perry**, **Maxwell Jeane**, **Peter Ohs**, and **Carl Mueller**.

Processing of retail reports was performed at the Jeffersonville Operations Office under the direction of **Robert D. Krook**. **Gene P. King** and **Waller Wynne, Jr.**, were directly in charge of the Economic Census Operations Branch. Data processing and related operations were performed by the Data Processing Systems Division, **Robert F. Drury**, Chief, and **R. M. Micoly**, Assistant Chief.

Louis Greenberg, in his capacity as Census of Business Coordinator, made important contributions to the planning and operational phases of the work.

Introduction

AUTHORITY AND SCOPE—The Census of Business is required by law under 13 U.S.C., sections 131 and 224. The 1963 census covered businesses in retail trade, wholesale trade, selected services, dental laboratories, and public warehousing operated in the United States, Guam, and the Virgin Islands. A separate 1963 Census of Business and Manufacturers for Puerto Rico was conducted jointly with the Commonwealth Government.

KINDS OF BUSINESS COVERED—This volume provides findings for retail stores in the areas covered and also for hotels, motor hotels, tourist courts, and motion picture theaters in those major retail centers which are defined as central business districts. Data for nonstore retailers are not included in this volume. For definitions, see Appendix A.

AREA COVERED—This volume includes a summary chapter and data for 116 standard metropolitan statistical areas. For each SMSA data are presented for census delineated major retail centers (including central business districts). The volume provides data for 131 central business districts and 972 major retail centers.

DELINEATION OF MAJOR RETAIL CENTERS—Two types of major retail centers have been delineated for this volume: (1) Central business districts (CBD's); and (2) concentrations of retail stores (other than CBD's) located in SMSA's for which CBD's were defined. The following paragraphs describe the steps taken in delineating these two classes of centers.

Prior to the 1954 Census of Business, many large cities had no officially defined area representing their "central business district." It was therefore necessary for the Bureau of the Census to arrange for the delineation of such districts before a program to tabulate census data for them could be implemented. This was accomplished with the cooperation of the Census Tract Committees in the large cities included in the CBD program. The Census Tract Committees in turn obtained the representation of a variety of local interests, such as business firms and associations, newspapers, planning agencies, welfare organizations, local governmental bodies, etc.

The Director of the Census Bureau, in a letter to the Census Tract Committees, stated that the objective in defining the CBD was "to provide a basis for comparing changes in business activity in the central business district

with those in the remainder of the metropolitan area or of the central city."

Since there were no generally accepted rules for determining what CBD area should include or exclude, the Census Bureau (1) provided a general characterization of the CBD as "an area of very high land valuation; an area characterized by a high concentration of retail businesses, offices, theaters, hotels, and "service" businesses; and an area of high traffic flow"; and (2) required that the CBD ordinarily should be defined to follow existing tract lines, i.e., to consist of one or more whole Census tracts. The emphasis on tract boundaries was based on the fact that Census statistics other than those derived from the Census of Business are identified in terms of tract location and therefore can conveniently be tabulated for CBD's.

It was recognized that the tract basis for CBD's might lead to the inclusion of area segments not consistent with the first criterion or to the exclusion of small segments which clearly belonged within the first criterion. It was believed that these shortcomings generally would not prove to be serious and that the differences in area probably would not significantly affect the totals for the items being measured. Provision, however, was made for splitting tracts where a serious problem was encountered. The use of tract lines for boundaries also was consistent with the desire to keep CBD boundaries constant in order to maximize the value of comparisons over time.

In some cities, previously established CBD's or similar areas which substantially corresponded to the Census Bureau's requirements for CBD's were accepted for use in the Bureau's program.

Major retail centers other than CBD's were first delineated by the Bureau of the Census as part of the 1958 Census of Business program. Major retail centers (MRC's) were defined by the Census Bureau as those concentrations of retail stores (located inside the standard metropolitan statistical areas in which the CBD cities are located but outside of the CBD's themselves) which include a major general merchandise store—usually a department store. MRC's were not delineated if the publication of data for them would result in violation of Census rules prohibiting disclosure of information for individual firms.

MRC's include not only the planned suburban shopping centers but also the older "string" street and neighborhood developments which meet the above prerequisites. Frequently the boundaries of a single MRC include stores located within a planned center and in addition

adjacent stores outside of the planned portion. In general the boundaries of the MRC's have been established to include all adjacent blocks containing at least one store in the general merchandise, apparel, or furniture-appliance groups of stores, and where a planned center is involved, to include all of the center.

Because MRC's tend to have a relatively small number of establishments, it generally is not possible to provide separate kind-of-business data (except for establishment counts) without infringement of the Bureau's legal requirement for maintenance of confidentiality. For this reason, it is necessary to limit the sales figures for MRC's to only—

1. Retail stores, total;
2. Convenience goods stores, i.e., food stores (SIC 54); eating and drinking places (SIC 58); and drug, proprietary stores (SIC 591).
3. Shopping goods stores, i.e., general merchandise stores (SIC 53 part); apparel, accessory stores (SIC 56); and furniture, home furnishings, equipment stores (SIC 57).
4. All other retail stores (SIC 52, 55, 59, except 591).

This report series (identified in the 1954 and 1958 censuses as the Central Business District Reports) was started as a part of the 1954 Census of Business, at which time data were provided for a total of 95 CBD's. In the 1958 Census of Business additional CBD's were defined and MRC's were identified for the first time. At that time data were published for 109 CBD's and for 472 MRC's located in 97 SMSA's. The present volume includes data for 131 CBD's located in 116 SMSA's and for 972 MRC's.

METHOD OF ENUMERATION—For purposes of coverage in the 1963 Census of Business, retail establishments were divided into two categories—those with some paid employment during 1963 (i.e., the "employer" universe) and those with no paid employment during 1963 (i.e., the "nonemployer" universe). The method of obtaining census information for these two groups is described below.

Enumeration of "Employers"—Information for establishments with some paid employment during 1963 was obtained by means of a mail canvass. Report forms were mailed to all business firms included in the active records of the Internal Revenue Service as subject to payment of Federal Insurance Contributions Act (FICA) taxes (i.e., employers of one or more persons) and which were classified in the

records of the Social Security Administration (SSA) as wholly or partially engaged in retail and wholesale trade, and in manufacturing and mineral industries. Also included were those firms classified in major groups 70 (except 702 and 704), 72, 73, 75, 76, 78, and 79 in the service industries portion of the SIC Manual¹; in SIC industry 8072, dental laboratories; and in public warehousing, SIC major group 42 (except 421). In addition, report forms were mailed to all establishments which the SSA had not classified by kind of business prior to mailing of census report forms. Each establishment was mailed a report form appropriate to its SSA classification (for those cases for which SSA classification had not yet been established, a general purpose form was used), but its census classification was determined by replies to questions on the census report form.

Enumeration of "Nonemployers"—Information for this group of establishments was obtained from the 1963 Federal income tax returns of retail businesses other than those represented in the active FICA records of the Internal Revenue Service. Although made up of a large number of establishments, the nonemployer segment accounts for only about 5 percent of total retail sales.

Data were compiled from only one-half of the nonemployer tax returns and were multiplied by two to establish census totals. Only those establishments were included here which reported a sales volume of \$2,500 or more during 1963, or, having been in operation for less than the full year, reported sales which would have reached a total of \$2,500 or more on an annual basis.

COMPARISON OF THE 1958 CENSUS WITH THE 1963 CENSUS—In all major respects, the 1958 and 1963 censuses were conducted under similar conditions and procedures. Strict comparability of the data for the two censuses is limited by the following factors:

1. In 1958, Alaska and Hawaii had not yet been admitted as States. Consequently, in the publications of the 1958 census, the totals for the United States included the then 48 States and the District of Columbia. In the 1963 census publications, the United States totals include the 50 States and the District of Columbia. Tables in the 1963 publications which show the United States totals for 1958 have been adjusted to include Alaska and Hawaii.

2. The physical area of a number of

¹Executive Office of the President, Bureau of the Budget, **Standard Industrial Classification Manual**, 1957, and **Supplement to 1957 Edition**, 1963.

urban places for which data are shown in the 1963 census is not the same as it was in the 1958 census because of annexations and other boundary changes which have occurred since 1958.

3. In the 1963 census, for the first time, nonemployer establishments which did not operate the entire year have been included if, during the period they operated, their receipts were at a rate which would have reached an annual total of \$2,500 or more had they operated the entire year. This change increases the count of nonemployer establishments but has little effect on the total volume of sales.

4. The number of active proprietors is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors if the establishment was in operation during November 1963. In the 1958 census, each business was asked to report this number.

5. In the 1963 census, information was collected on retail sales by merchandise lines. Such information had last been collected as part of the 1948 census. These data all are published in Vol. I, **Retail Trade—Summary Statistics**, and in separate reports as part of the subject preprint series, BC63-RS. The information collected in the 1963 census includes broad merchandise lines, for which all employer establishments were required to report, and a variable number of additional lines more specifically oriented to a single kind of business or a group of related businesses. In addition to its primary use of making possible the presentation of data on the extent of diversification in retail establishments, this information was also used in assigning establishments to specific kinds of business.

6. The use of information on sales by merchandise lines in assigning kind-of-business codes has provided a more detailed basis for classification than previously was available. In some cases this could have resulted in classifications which were different than would have been assigned if the information available had been the same as in the 1958 census. In the 1963 census, stores provided a breakdown by merchandise lines of all their sales rather than of major lines as in the 1958 census. In the women's apparel field, for example, such differences in the inquiries may have occasioned

a shift in the classification of a number of stores from the kind of business "women's ready-to-wear stores" to "women's accessory, specialty stores." In addition, the introduction of this system made possible the segregation of the new category "home, auto supply stores" from the category "tire, battery, accessory dealers."

7. Some changes were made in the 1963 census in the individual kind-of-business classifications. The kinds of business involved are—

- Meat markets
- General stores
- Tire, battery, accessory dealers
- Home, auto supply stores
- Eating places
- Refreshment places
- Optical goods stores
- Nonstore retailers

8. In 1963 a new method of determining the places in which business establishments were located was instituted. This method utilized high speed electronic computers and extensive files of addresses classified by place. It is believed that the major effect of this new procedure has been to correctly allocate to suburban places some establishments which previously had been allocated to adjacent cities because of a tendency of respondents to identify their location as being in the adjacent city although actually located beyond that city's boundaries.

CENSUS DISCLOSURE RULES—In accordance with Federal law governing census reports, any data which disclose the operations of an individual establishment or business organization are not published. However, the number of establishments in a kind of business is not considered a disclosure, so that this item may appear in instances where other items of information for the same kind of business or locality are withheld.

STANDARD METROPOLITAN STATISTICAL AREAS—The standard metropolitan statistical areas (SMSA's) covered by this volume are those defined by the Bureau of the Budget in 1964¹ which contain one or more cities having a population of 100,000 or more inhabitants.

¹ Executive Office of the President, Bureau of the Budget, **Standard Metropolitan Statistical Areas**, 1964.

The chapters of this volume comprise the statistical portions of previously published area reports (series BC63-MRC). Corrections found

Volume two

WHOLESALE TRADE—AREA STATISTICS

A United States summary chapter and chapters for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics are presented by kind of business for counties, cities, standard metropolitan statistical areas, and for selected towns and townships of New England, New Jersey, and Pennsylvania. The kind-of-business detail varies in accordance with the number of retail establishments in an area. This volume incorporates the area preprints, series BC63-RA.

Volume three

MAJOR RETAIL CENTERS STATISTICS

A United States summary chapter and chapters for each of 116 standard metropolitan statistical areas (SMSA's). Each SMSA chapter presents statistics for retail trade by kind of business and for hotels and motion picture theaters (a) in the entire SMSA, (b) in almost all cities of 100,000 inhabitants or more, and (c) in central business districts of these cities. Each chapter also presents statistics for the major retail centers outside the central business district showing (a) sales and establishment counts in three major subgroups of retail trade and (b) establishment counts only by kind of business. This volume incorporates the major retail centers preprints, series BC63-MRC.
